Biomarkers in clinical trials: Overview of roadmaps for PD/ prognostic/predictive biomarkers

Herbie Newell

Newcastle Cancer Centre

Northern Institute for Cancer Research

Targeted Therapies – The Future of Cancer Treatment

Agents which exploit the molecular and cellular pathology of cancer:

- Oncogene antagonsists
- Tumour suppresor gene agonists
- Immortality gene inhibitors
- Anti-angiogenic agents
- Anti-invasive and anti-metastatic drugs

Biomarkers – Definition

A biomarker is:

“A characteristic that is objectively measured and evaluated as an indicator of normal biological processes, pathological processes, or responses (pharmacologic or otherwise) to a therapeutic intervention”

Or

A test!

CANCER RESEARCH UK

The Cancer "Journey"

1:3 of us will get cancer

- Am I going to get cancer?
- Have I got cancer?
- What kind of cancer is it?
- How bad is my cancer?
- What is the best treatment?
- Is the treatment working?

The Cancer Patient Journey

1:3 of us will get cancer

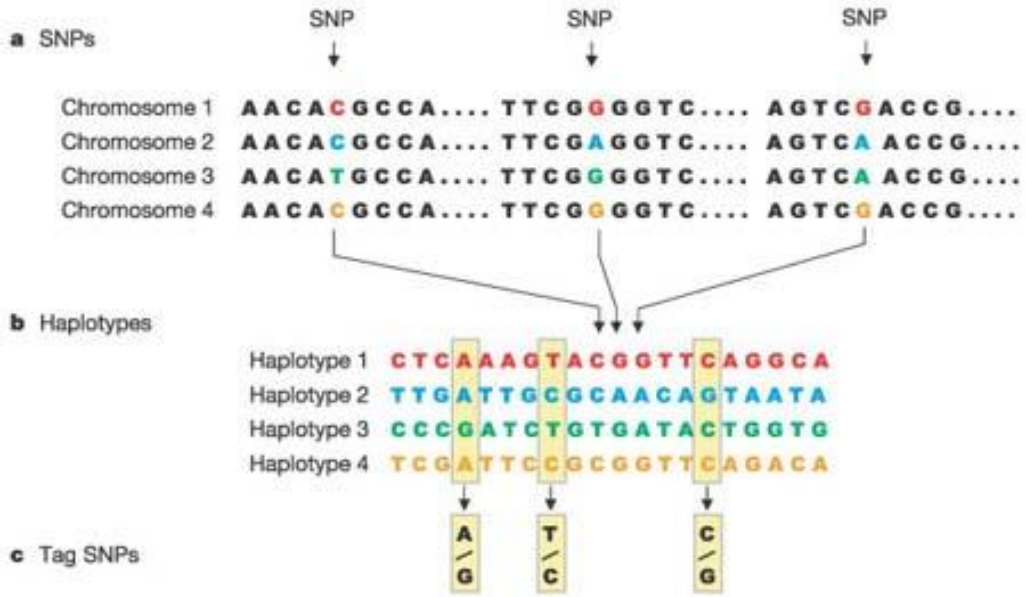
- How bad is my cancer? **TESTS**
- What is the best treatment? **TESTS**
- Is the treatment working? **TESTS**

Biomarkers in Cancer Management

Am I going to get cancer?

Predisposition biomarkers - Identification of individuals at risk of developing cancer



CANCER RESEARCH UK

Biomarkers in Cancer Management

Have I got cancer?

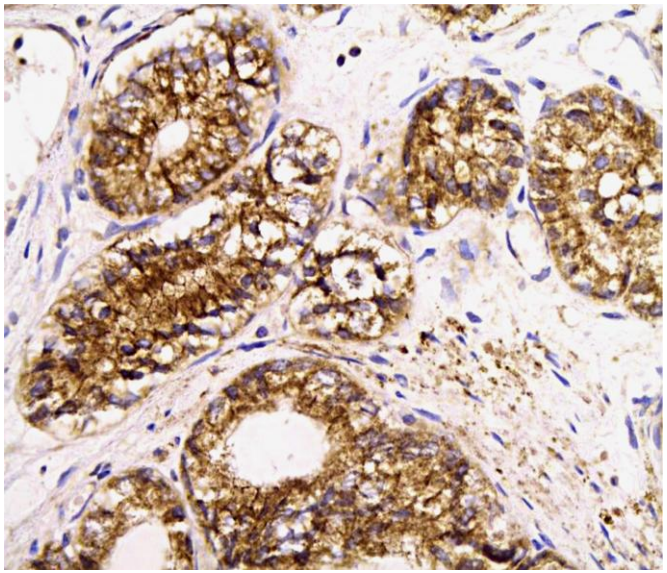
Screening biomarkers - Early detection of cancer in the general or at risk populations

CANCER RESEARCH UK

Biomarkers in Cancer Management

What kind of cancer is it?

Diagnostic biomarkers - Definition of tumour type, stage and grade



BTA stat® TEST

CANCER RESEARCH UK

Biomarkers in Cancer Management

How bad is my cancer?

Prognostic biomarkers - Identification of the likely clinical disease course and hence appropriate therapeutic approach

MammaPrint®

Biomarkers in Cancer Management

What is the best treatment?

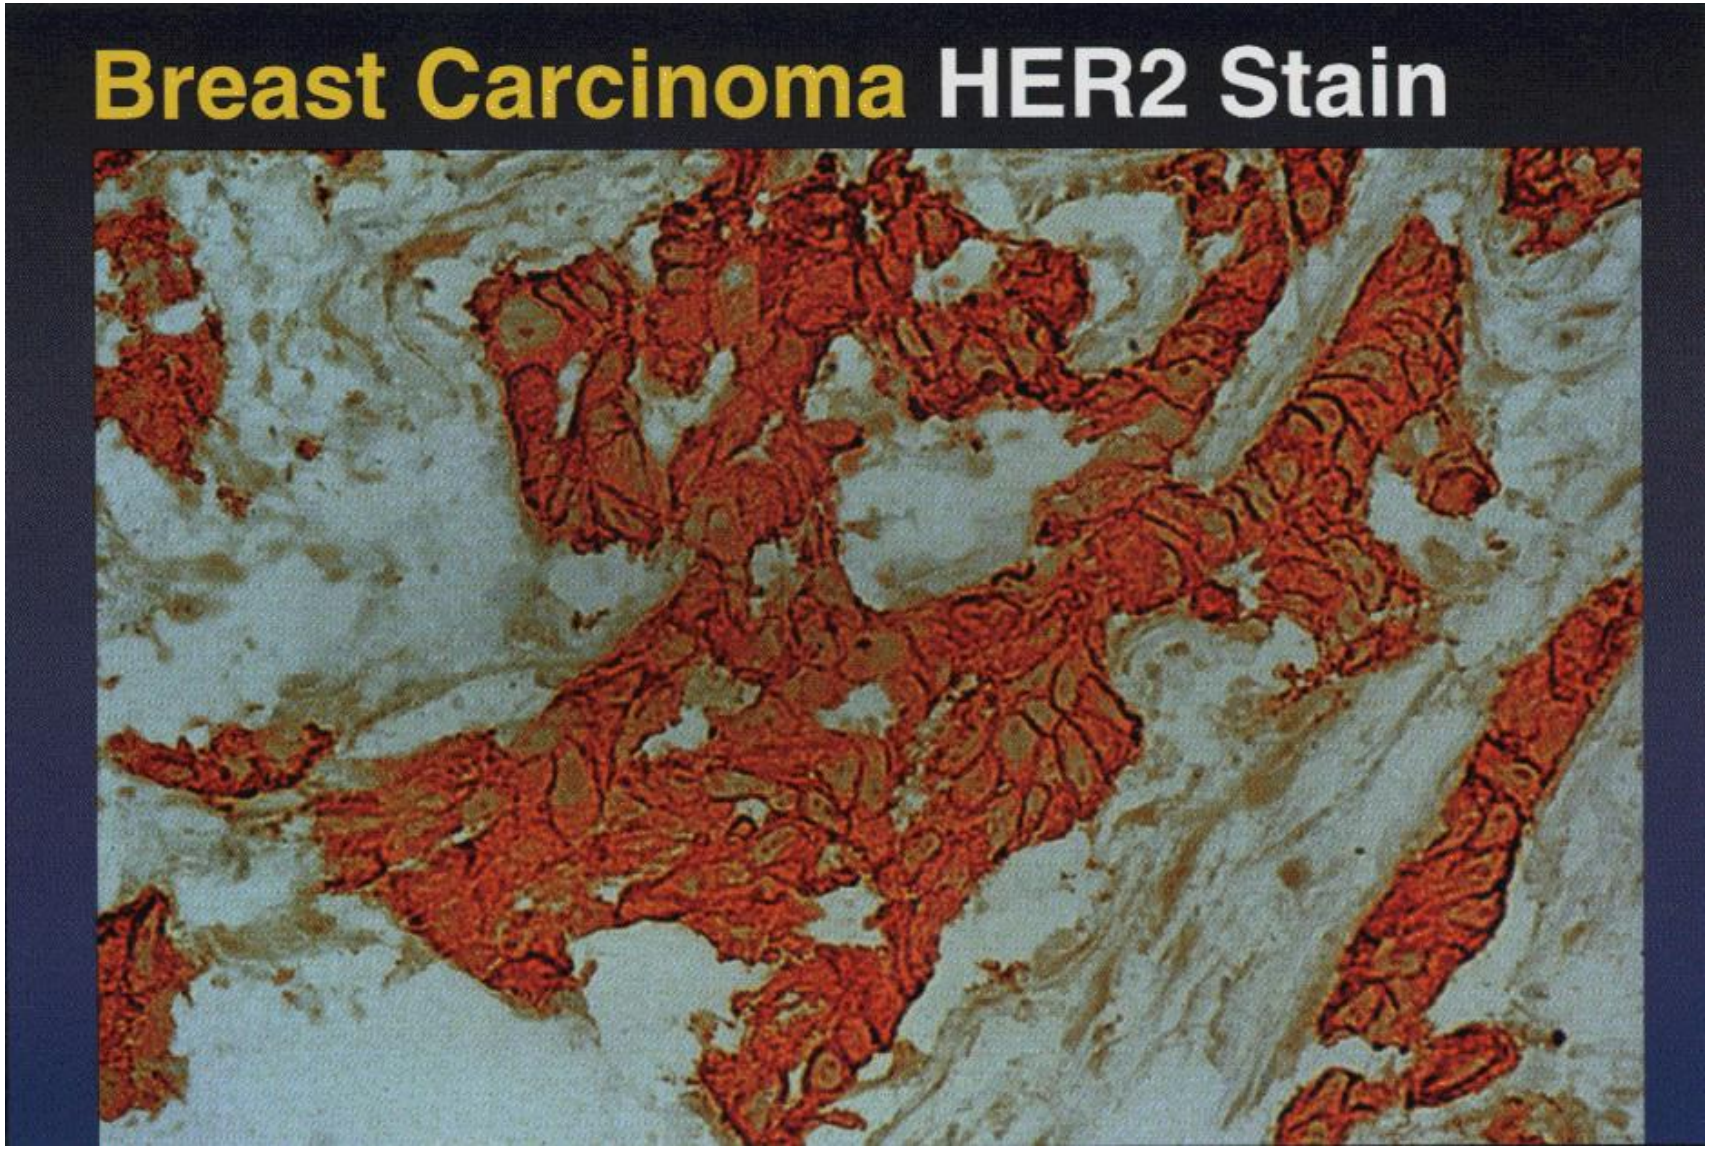
Predictive biomarkers - Patient enrichment to maximize likely benefit from specific therapies:

Positive – Patients with the biomarker should receive therapy

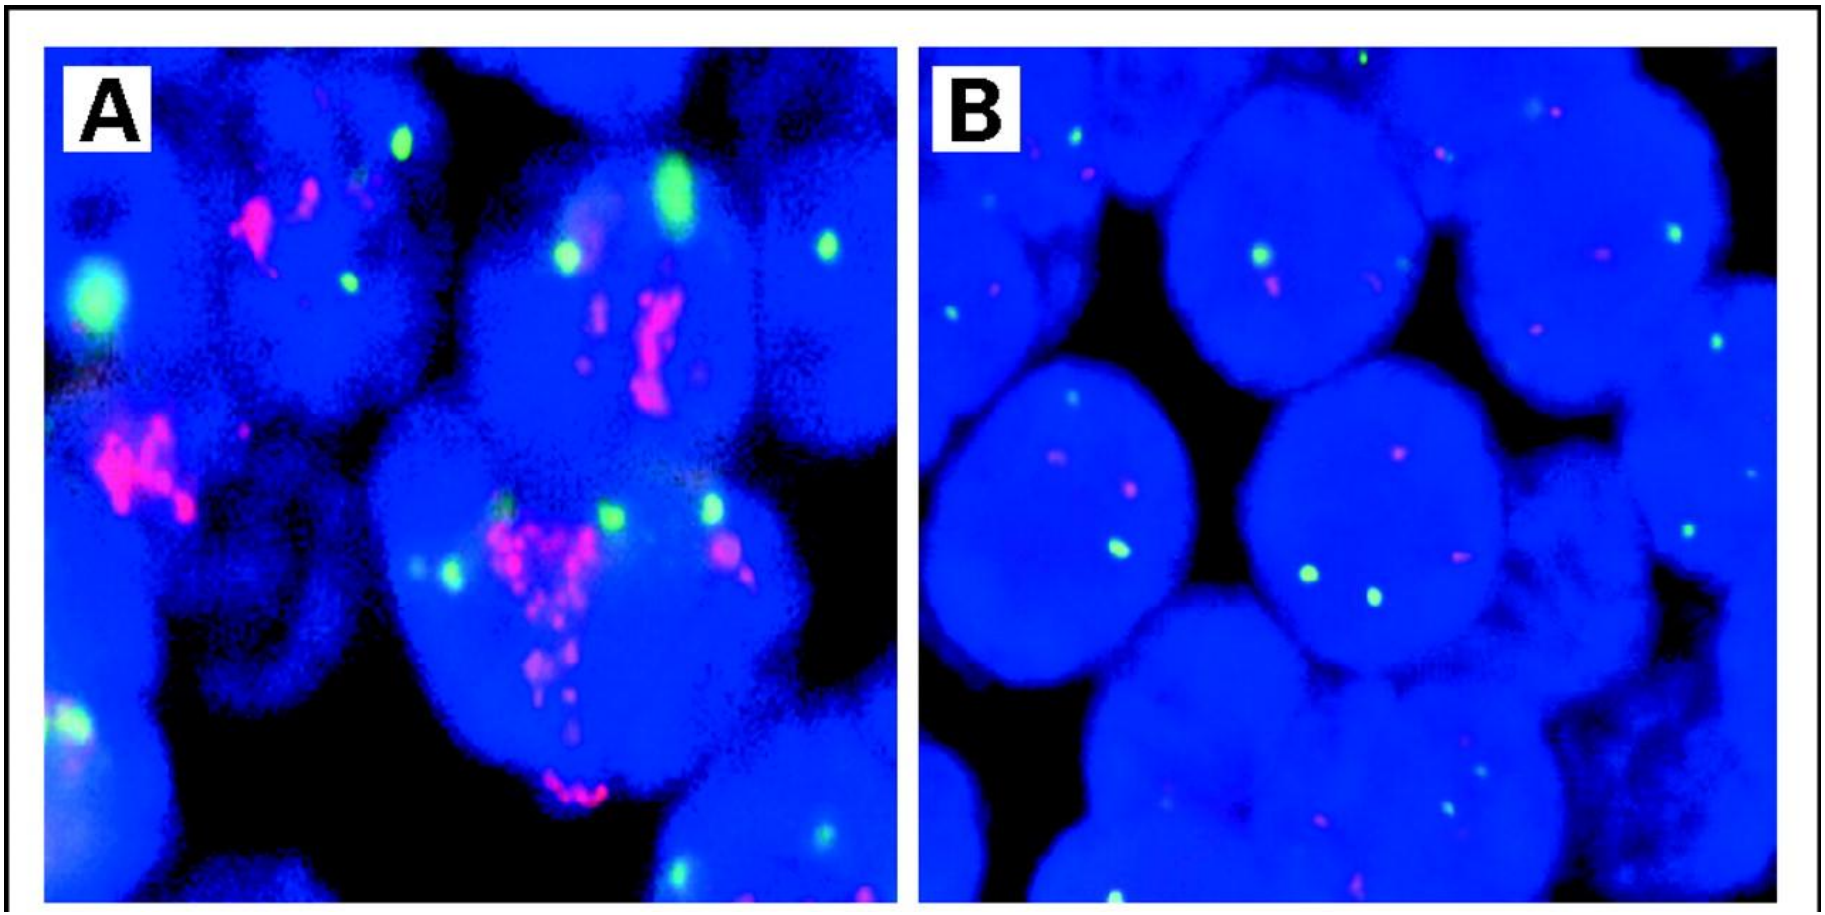
Negative – Patients with the biomarker should not receive therapy

CANCER RESEARCH UK

Positive Predictive Biomarker
- *HER2* expression in breast cancer



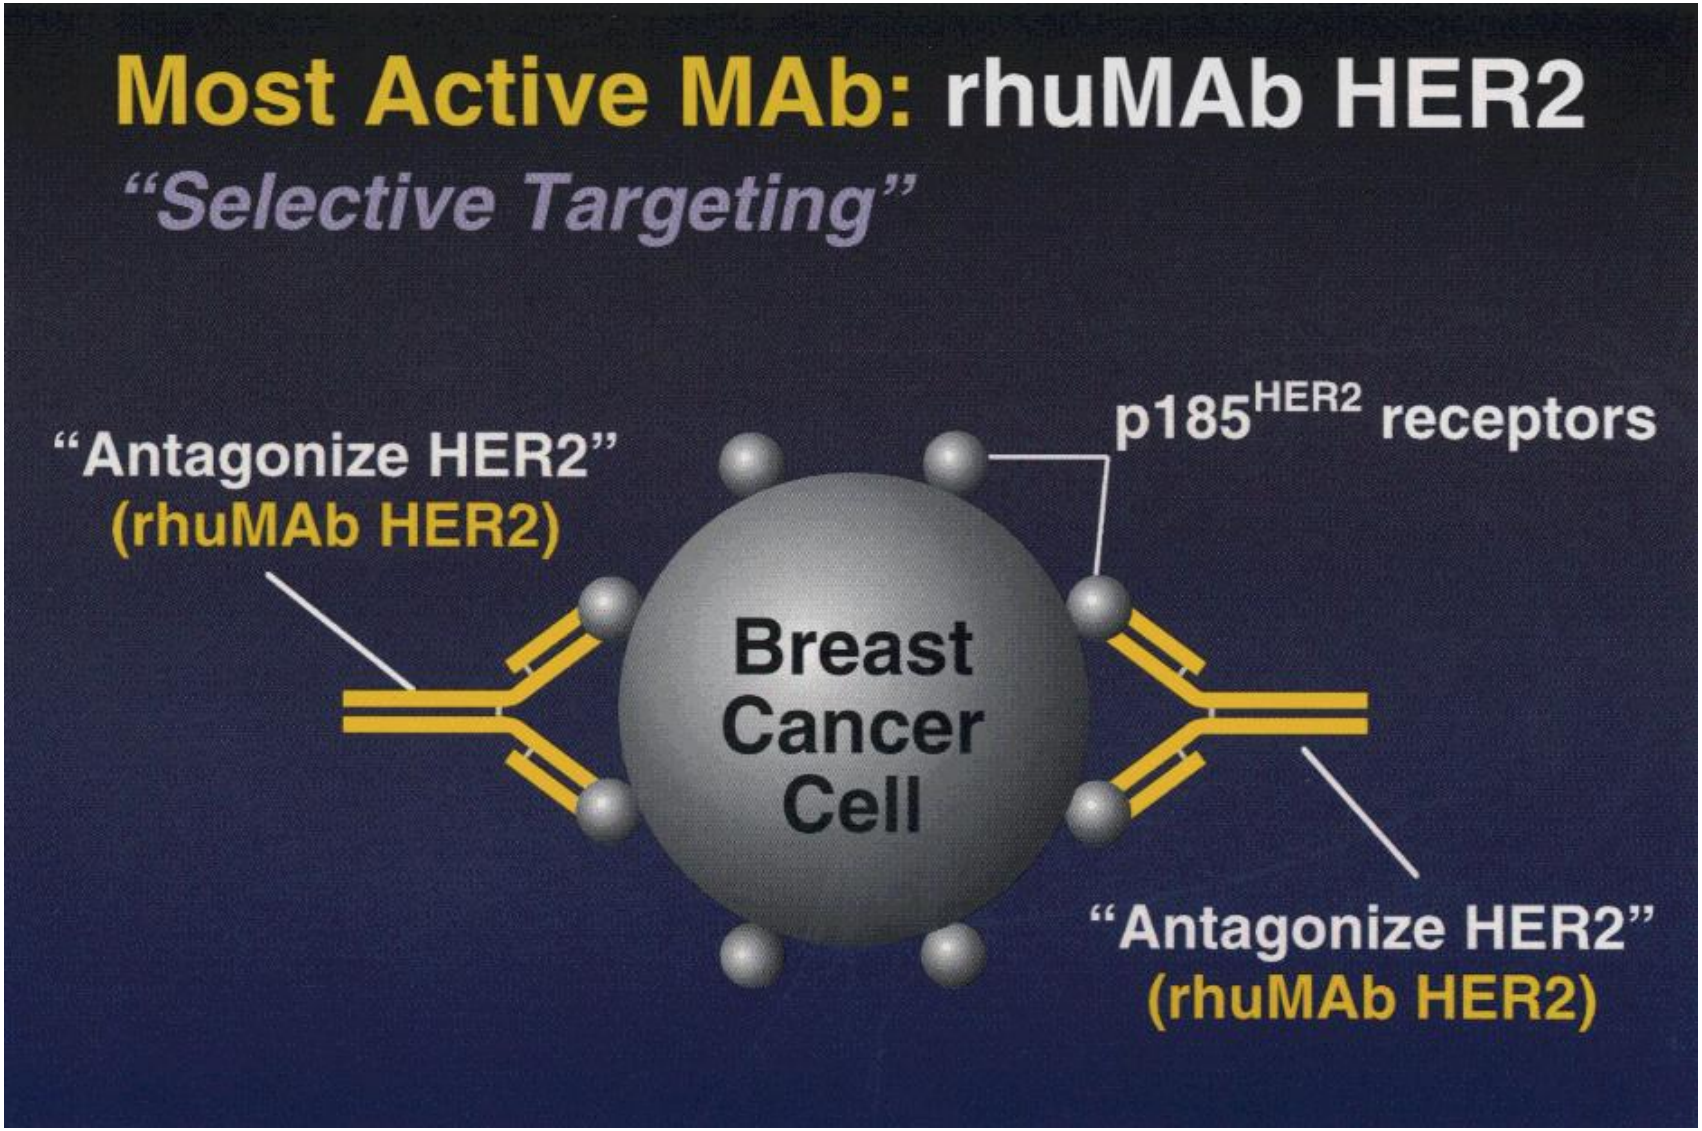
Positive Predictive Biomarker
- *HER2* amplification in breast cancer



Sauter, G. et al. J Clin Oncol; 27:1323-1333 2009

JOURNAL OF CLINICAL ONCOLOGY

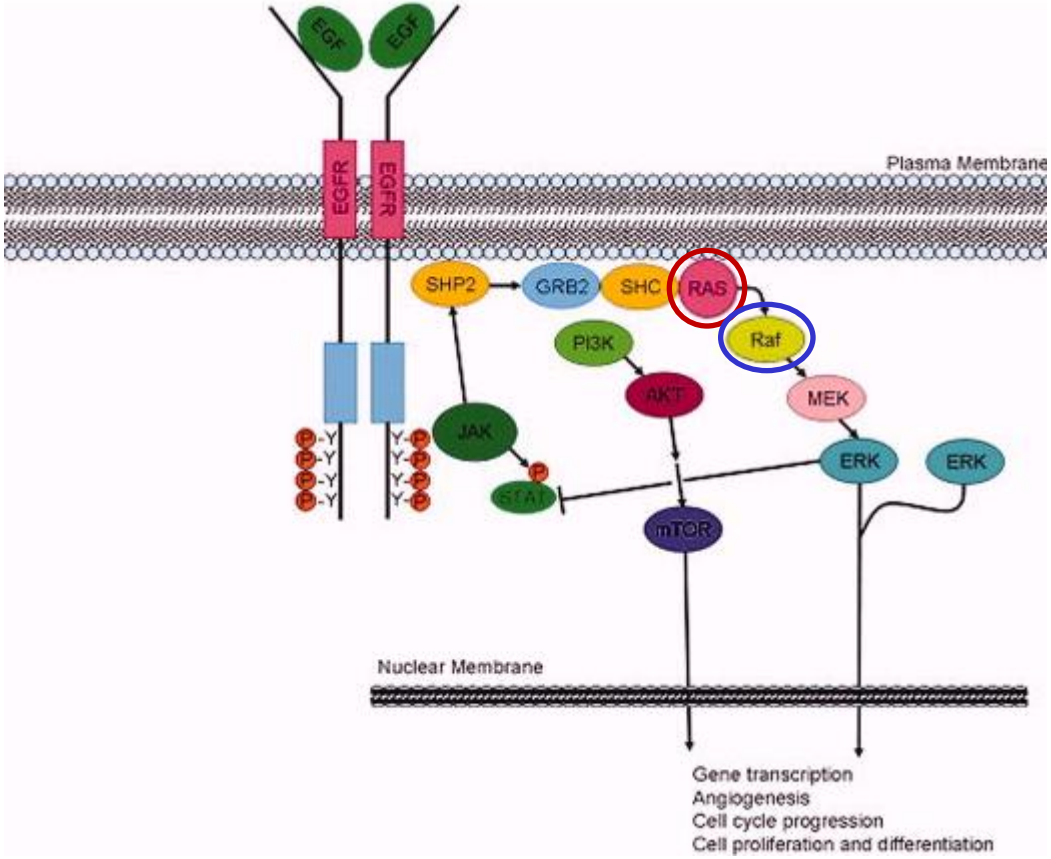
Positive Predictive Biomarker
- Trastuzumab therapy in breast cancer



Positive Predictive Biomarker
- *HER2* amplification and trastuzumab therapy in breast cancer

Study and *HER2* Amplification	No. of Assessable Patients	Objective Response (CR plus PR)	
		No.	%
H0649g			
FISH positive	173	33	19
FISH negative	36	0	0
H0650g			
FISH positive	82	28	34
FISH negative	29	1*	3.5

Negative Predictive Biomarker
- *K-Ras* and *B-Raf* Mutation in Colorectal Cancer



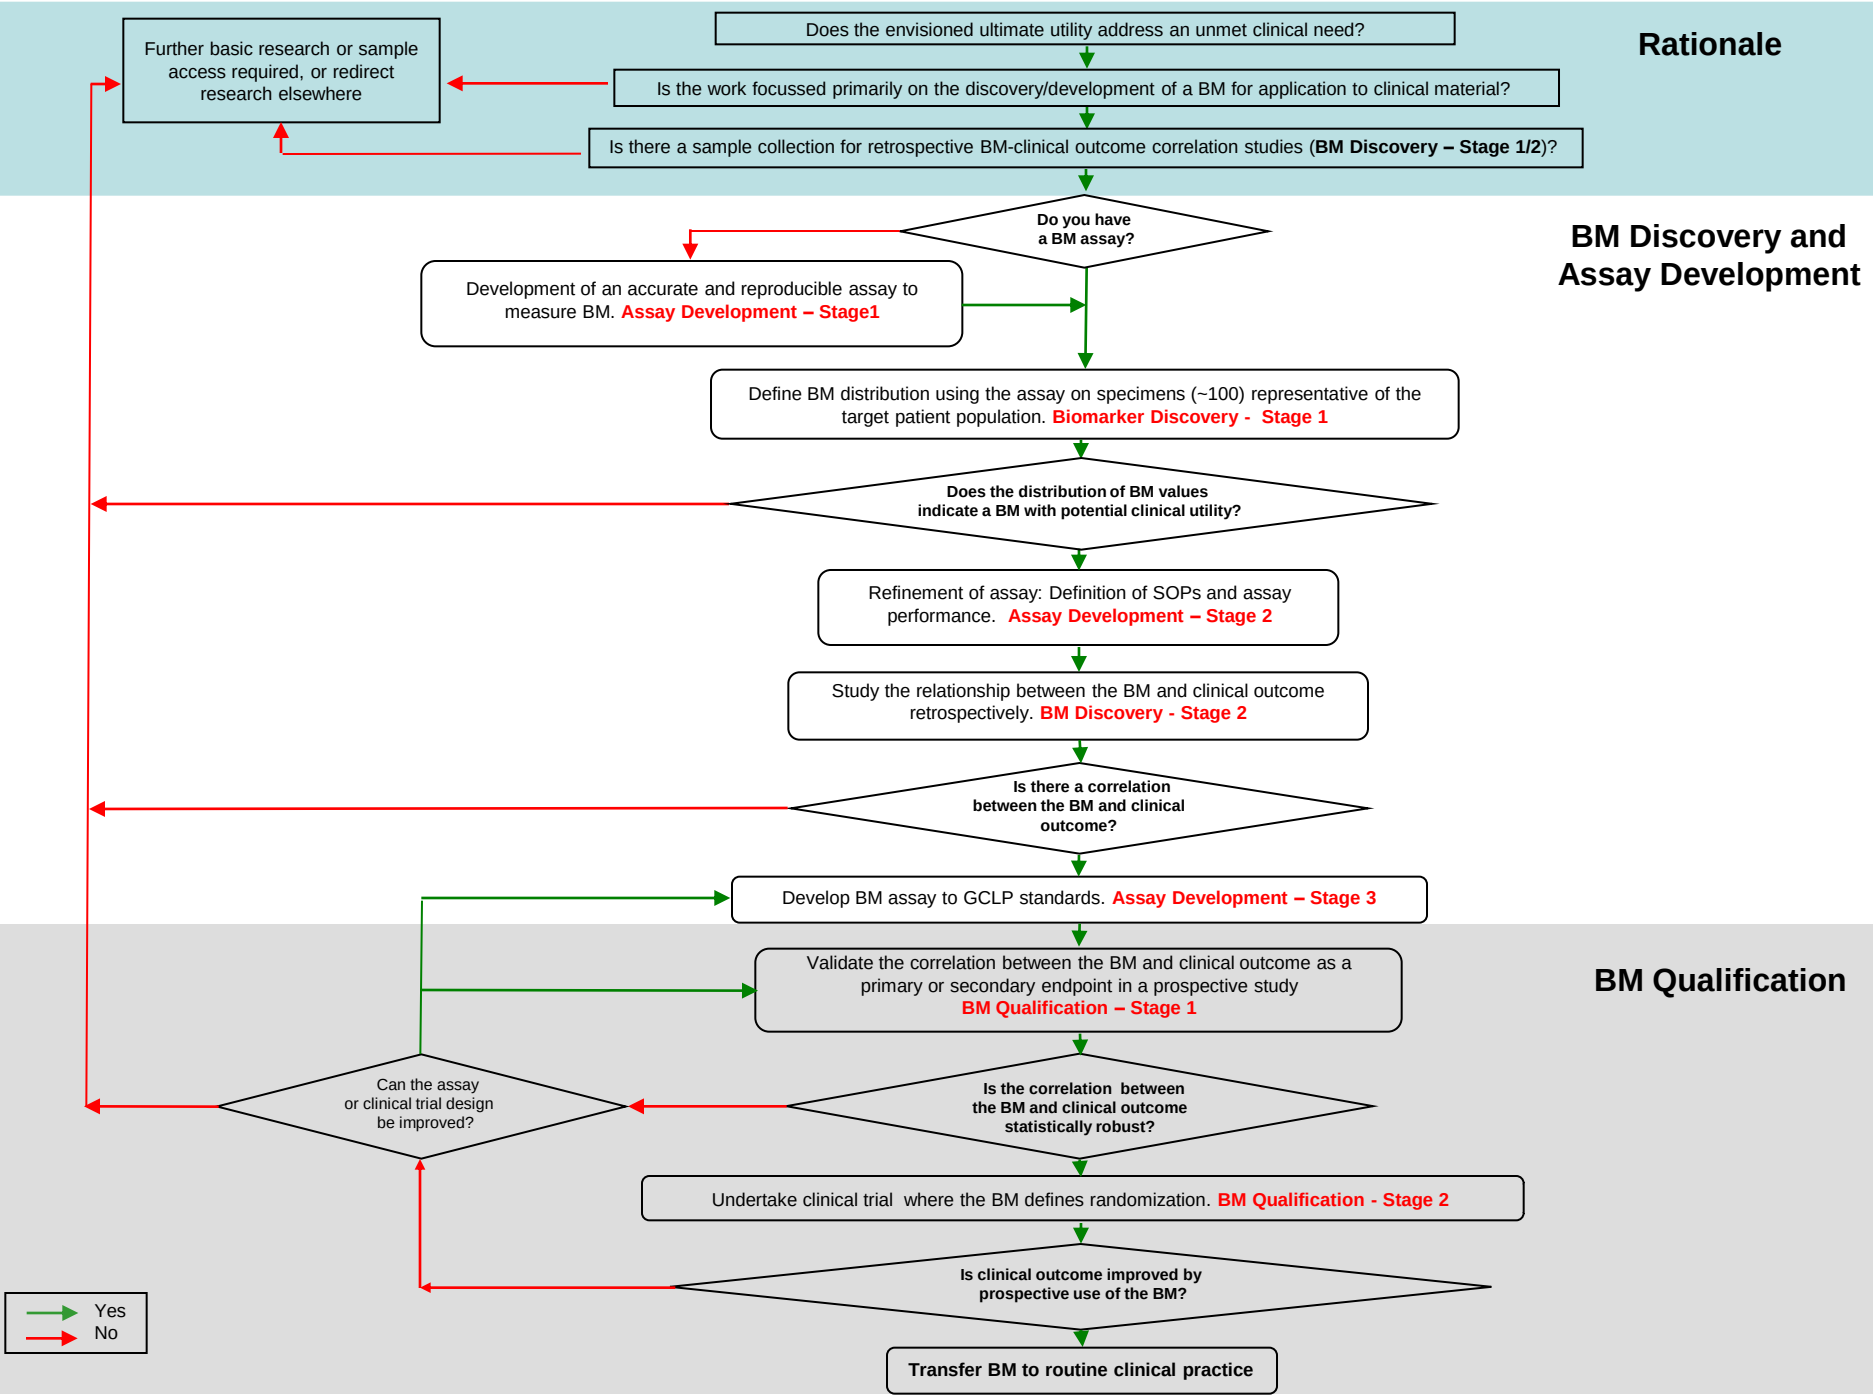
- ***K-Ras*** is mutated in 30-50% of colon cancer
- ***B-Raf*** is mutated ca. 10% of colorectal cancers
- Mutant *K-Ras* is a negative prognostic biomarker in colorectal cancer

Negative Predictive Biomarker
- *K-ras* mutation and EGFr-targeted antibody therapy in colorectal cancer

Study	Drugs	Size	WT K-*ras*	Mut K-*ras*	p =
Personeni	C +/- irinotecan	54	22%*	0%	0.05
Finocchiaro	C	81	27%	6%	0.02
De Rook	C +/- irinotecan	37	22%	0%	<0.01
Viret	C+irinotecan	32	22%	6%	NS
Stoehlmacher	C + irinotecan or +FOLFOX/FIRI	30	56%	0%	<0.01
Amado	Panitumumab	427	17%	0%	-
Van Cutsem	C + FOLFIRI	540	59%	36%	-
Bokeneyer	C + FOLFOX	233	61%	33%	-
Tejpar	C + irinotecan	148	46%	0%	-

C = Cetuximab, NS = not significant, ND = not determined, * % = response rate

PROGNOSTIC/PREDICTIVE BIOMARKER (BM) ROADMAP



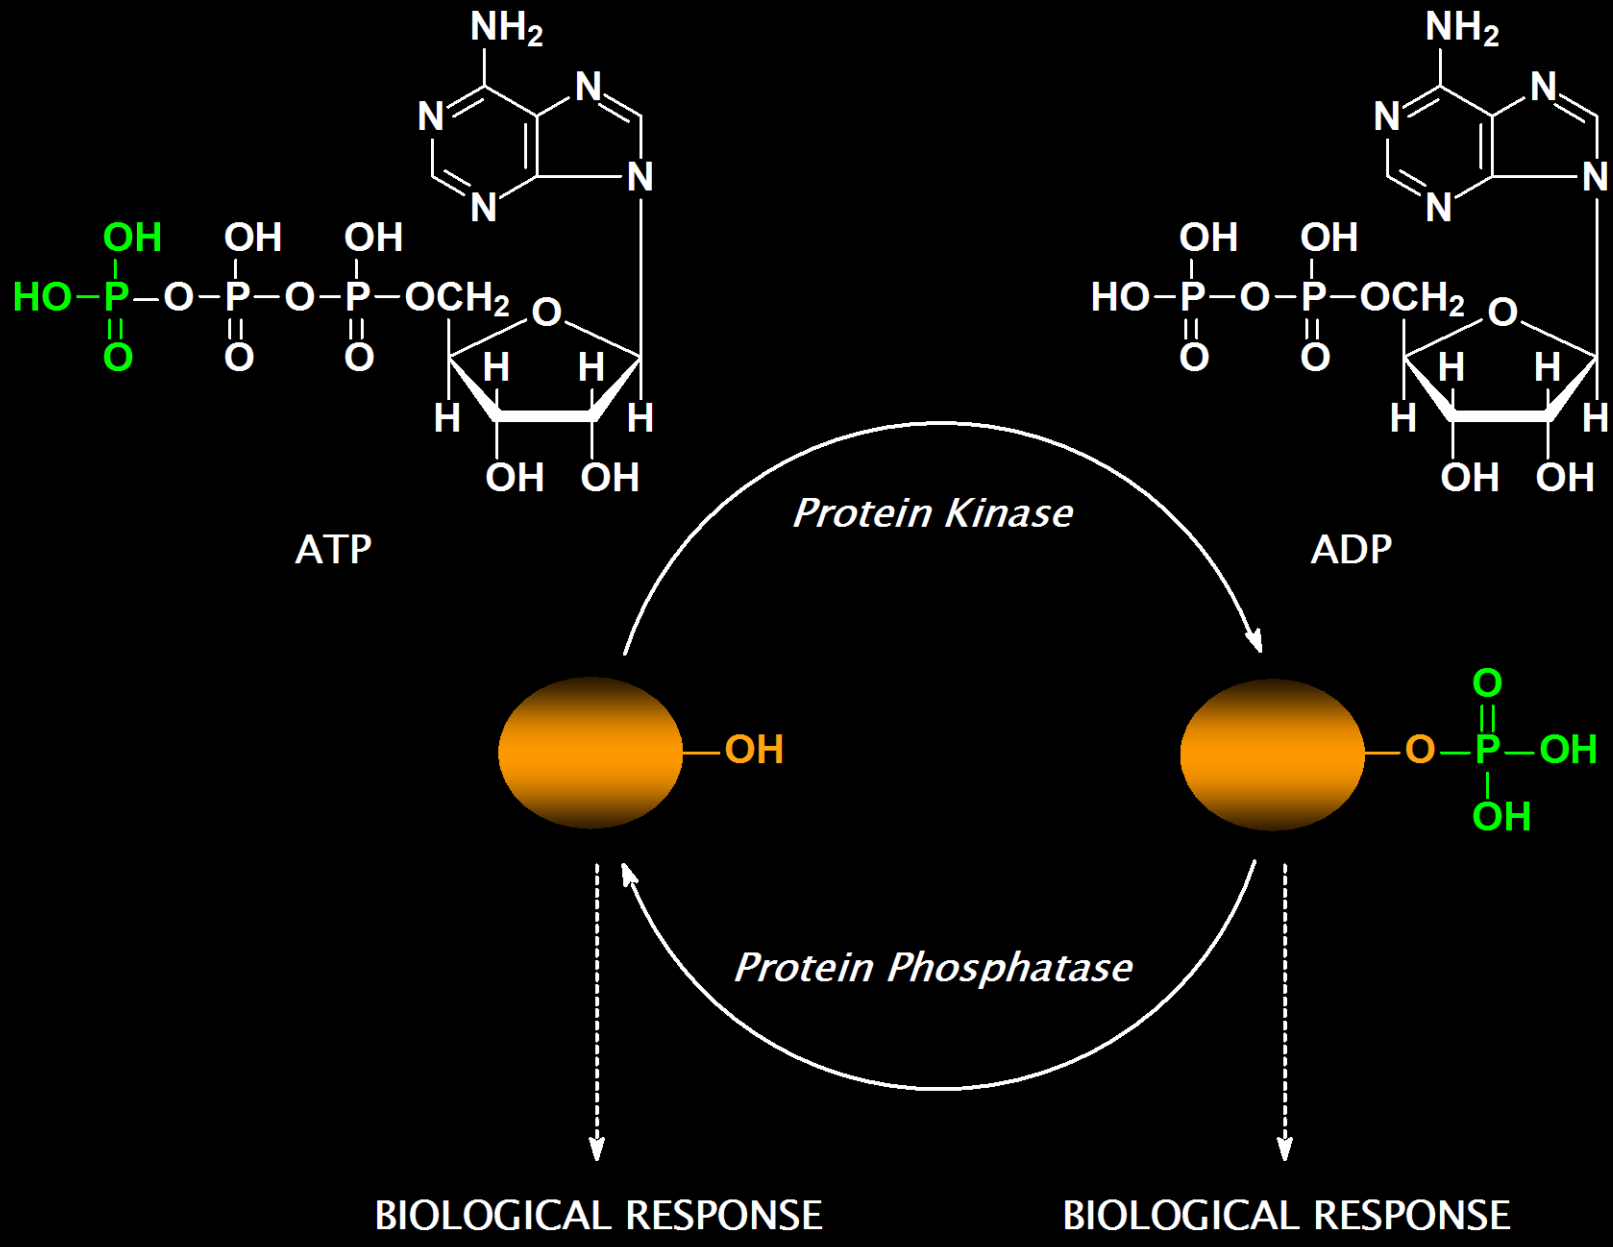
Clinically Established Predictive Biomarkers for Targeted Therapies

- **Positive Predictive Biomarkers**
  - *Her2/c-ErbB2* amplification: Trastizumab, lapatinib in breast cancer
  - *EGFr* mutation: Gefitinib, erlotinib in non-small cell lung cancer
  - *c-Kit* mutation: Imatinib in GIST
  - *Alk* amplification/translocation: Crizotinib in lymphoma/lung cancer
  - *B-Raf* mutation: Vemurafenib in melanoma
  - *Bcr-Abl* translocation: Imantinib, dasatinib, nilotinib in CML/ALL
  - Oestrogen receptor expression: Anti-oestrogens in breast cancer
  - *RAR* translocation: All-*trans*-retinoic acid in PML
- **Negative Predictive Biomarkers**
  - *K-Ras/B-Raf* mutation: Cetuximab, panitumumab in colorectal cancer

Biomarkers in Early Phase Trials with Targeted Therapies in Cancer

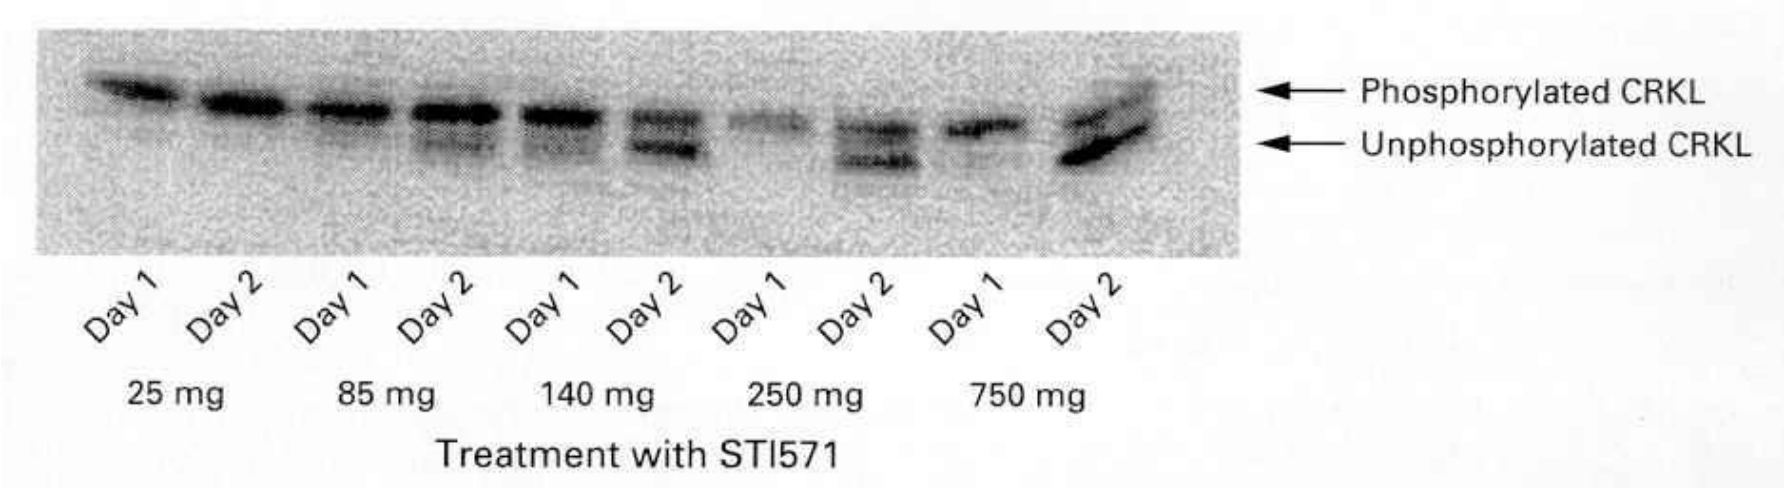
- Predictive biomarkers
  - Does the tumour have the target and is it functional?
- Pharmacokinetic biomarkers
  - Are active drug levels achieved?
- Pharmacodynamic biomarkers
  - Proof of mechanism (POM)
    - Does the drug hit its target?
  - Proof of concept (POC)
    - Is the required effect on tumour biology produced?
- Surrogate response biomarkers
  - Is the patient going to benefit?

Mechanism of Action of Protein Kinases



Imatinib - POM PD Biomarker

Proof-of-mechanism (POM) pharmacodynamic biomarker - inhibition of CRKL phosphorylation



POC PD Assays for Apoptosis Induction by Targeted Agents

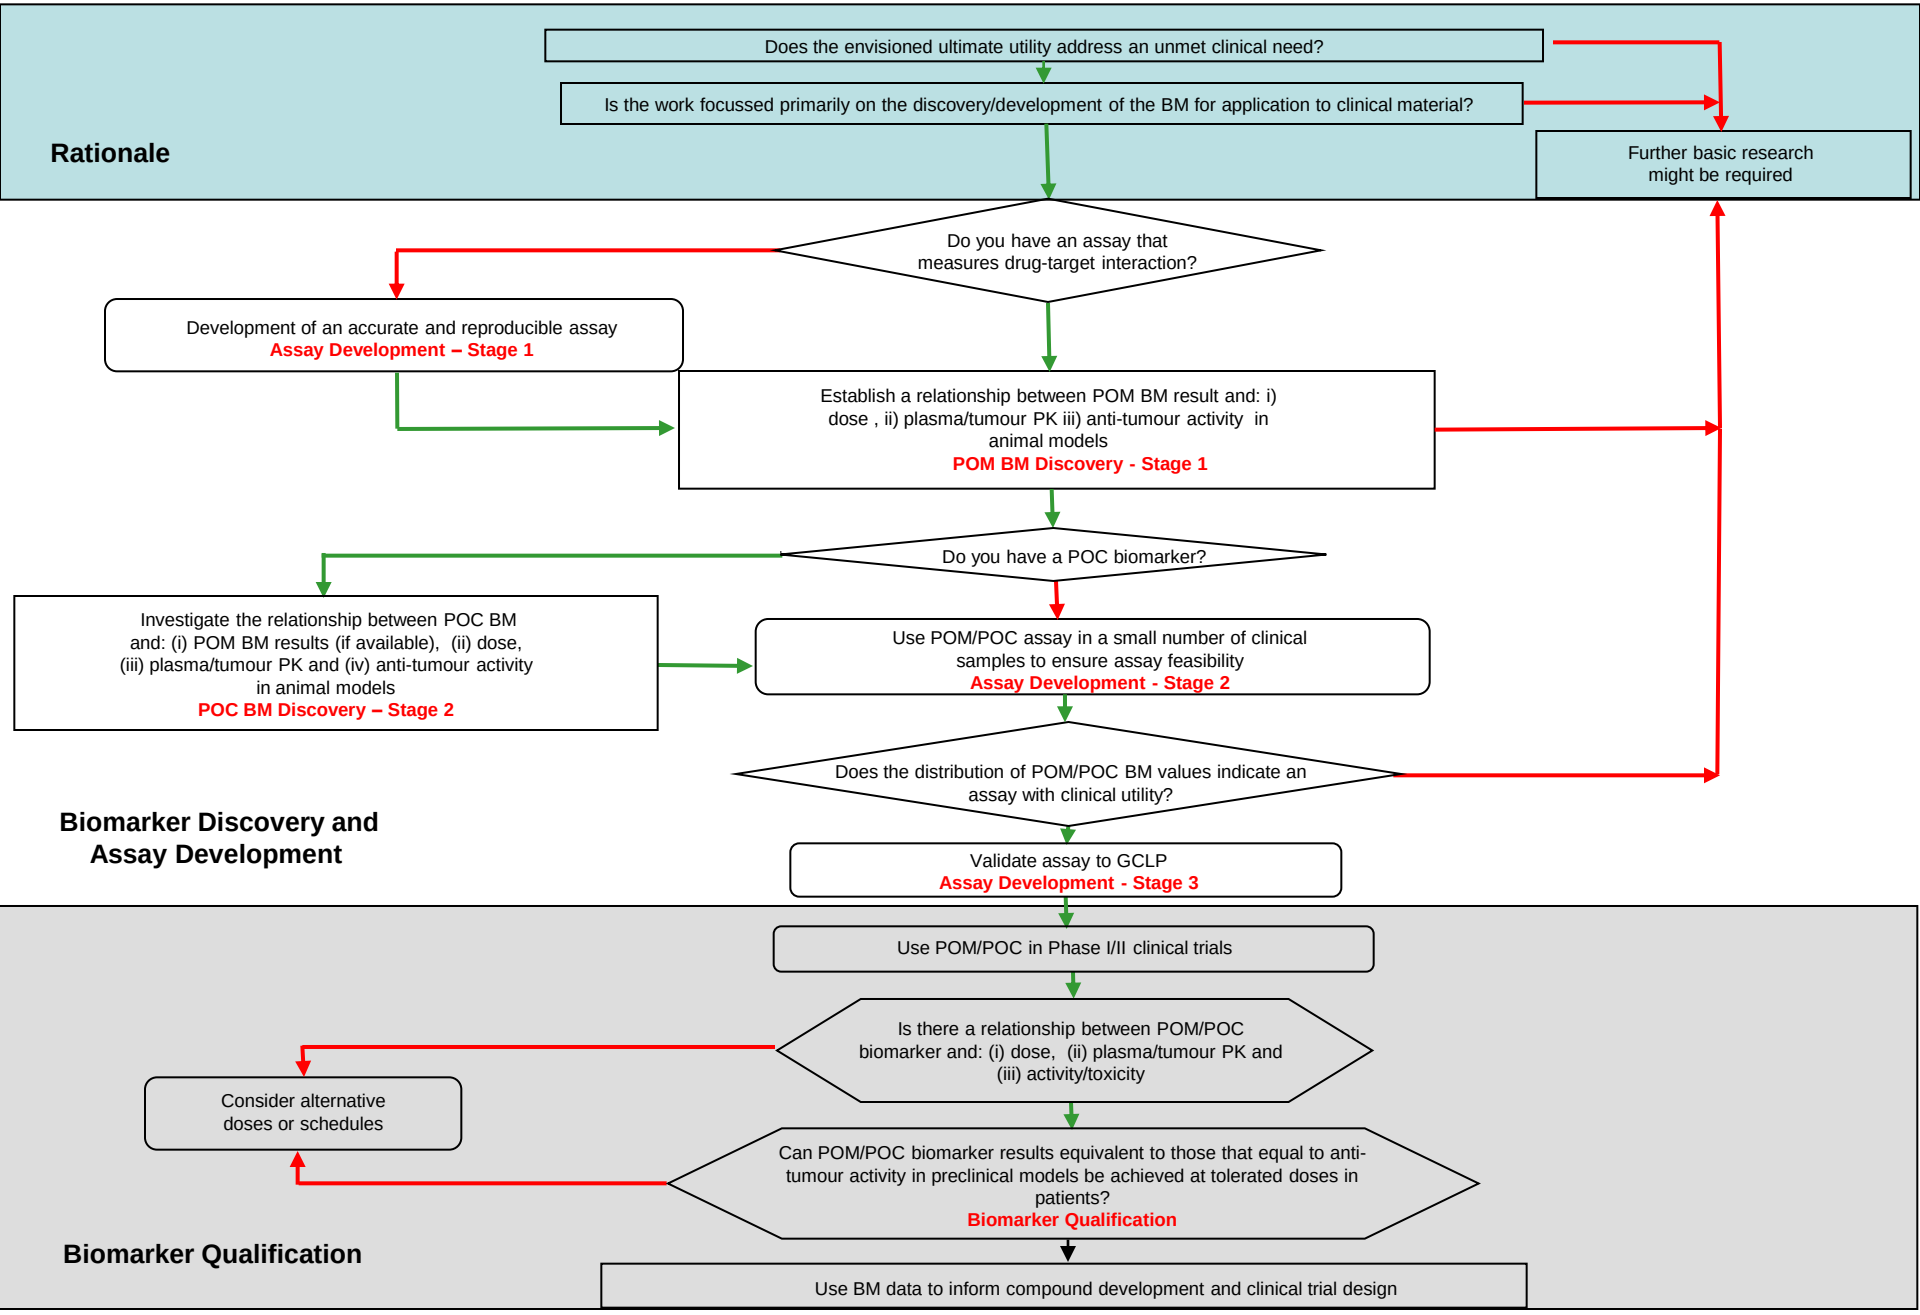
PHARMACOLOGICAL BIOMARKER (BM) ROADMAP



Biomarkers in Cancer Management

Is the treatment working?

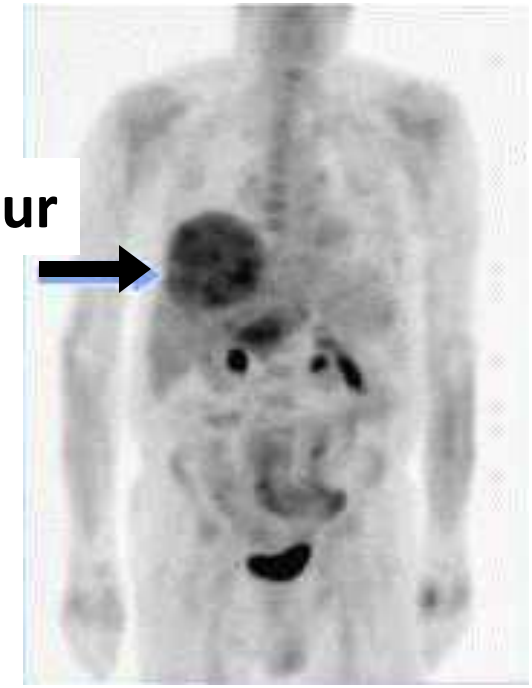
Surrogate response biomarkers - Early prediction of ultimate clinical efficacy

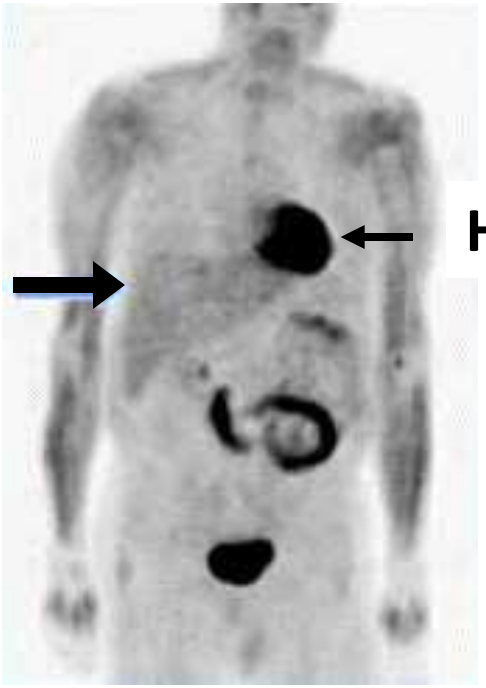
CANCER RESEARCH UK

^{18}F-Fluorodeoxyglucose PET Scanning in GIST as a Surrogate Response Biomarker – Imatinib Therapy

PET Scans **Tumour**

1 month apart

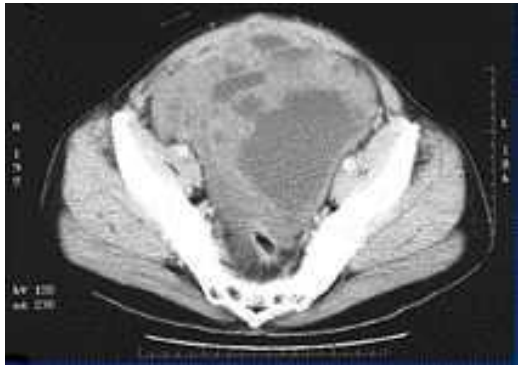




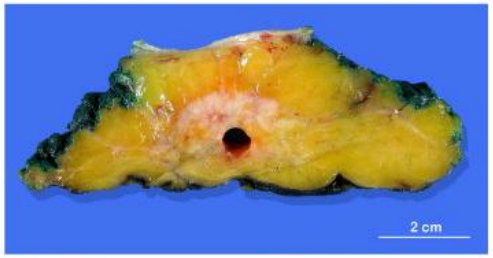
Heart

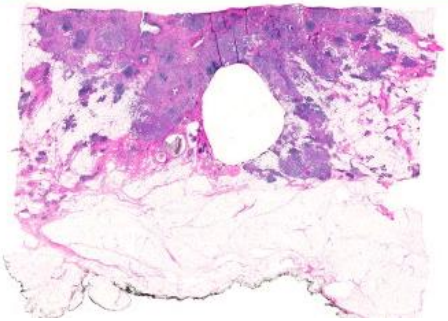
CT Scans

6 months apart



Biomarker Approaches



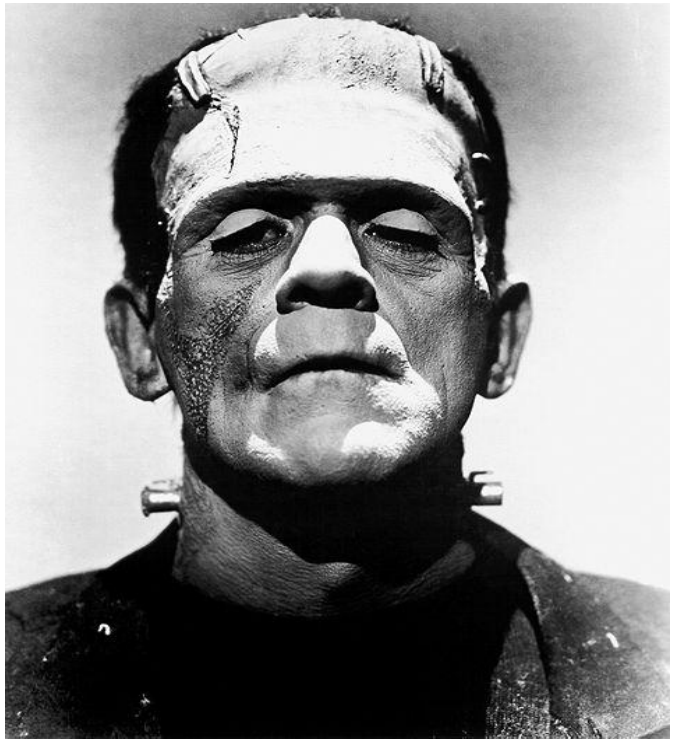


- **Invasive**
  - Tumour biopsy
  - Normal tissue biopsy
  - Blood borne

- **Non-Invasive (Imaging)**
  - MR
  - PET
  - Others (SPECT, ultrasound, etc)

Targeted Therapies and Stratified Medicine - Science fact *NOT* science fiction

- **Growth factor and receptor antagonists**
  - Bevacizumab, cetuximab, crizotinib, gefitinib, erlotinib, rituximab, sorafinib, sunitinib, trastuzumab
- **Second messenger or signal transduction inhibitors**
  - Imatinib, dasatinib, nilotinib, sorafinib, vemurafenib
- **Regulators of gene expression**
  - All-*trans* retinoic acid
  - SAHA
  - Anti-estrogens and anti-androgens



Predictive, Pharmacological and Surrogate Response Biomarkers for Stratified Medicine with Targeted Therapies in Cancer

Biomarkers

- Predictive
- PK
- PD – POM
- PD - POC
- Surrogate response
