

HRA Approval update

May 2015

- VISION: to make it easier to undertake responsible health research in the NHS in England as part of a UK-wide system.
- AIM: to simplify the process for approval of health research for researchers, thus reducing the time and cost of setting up studies.

Programme objectives

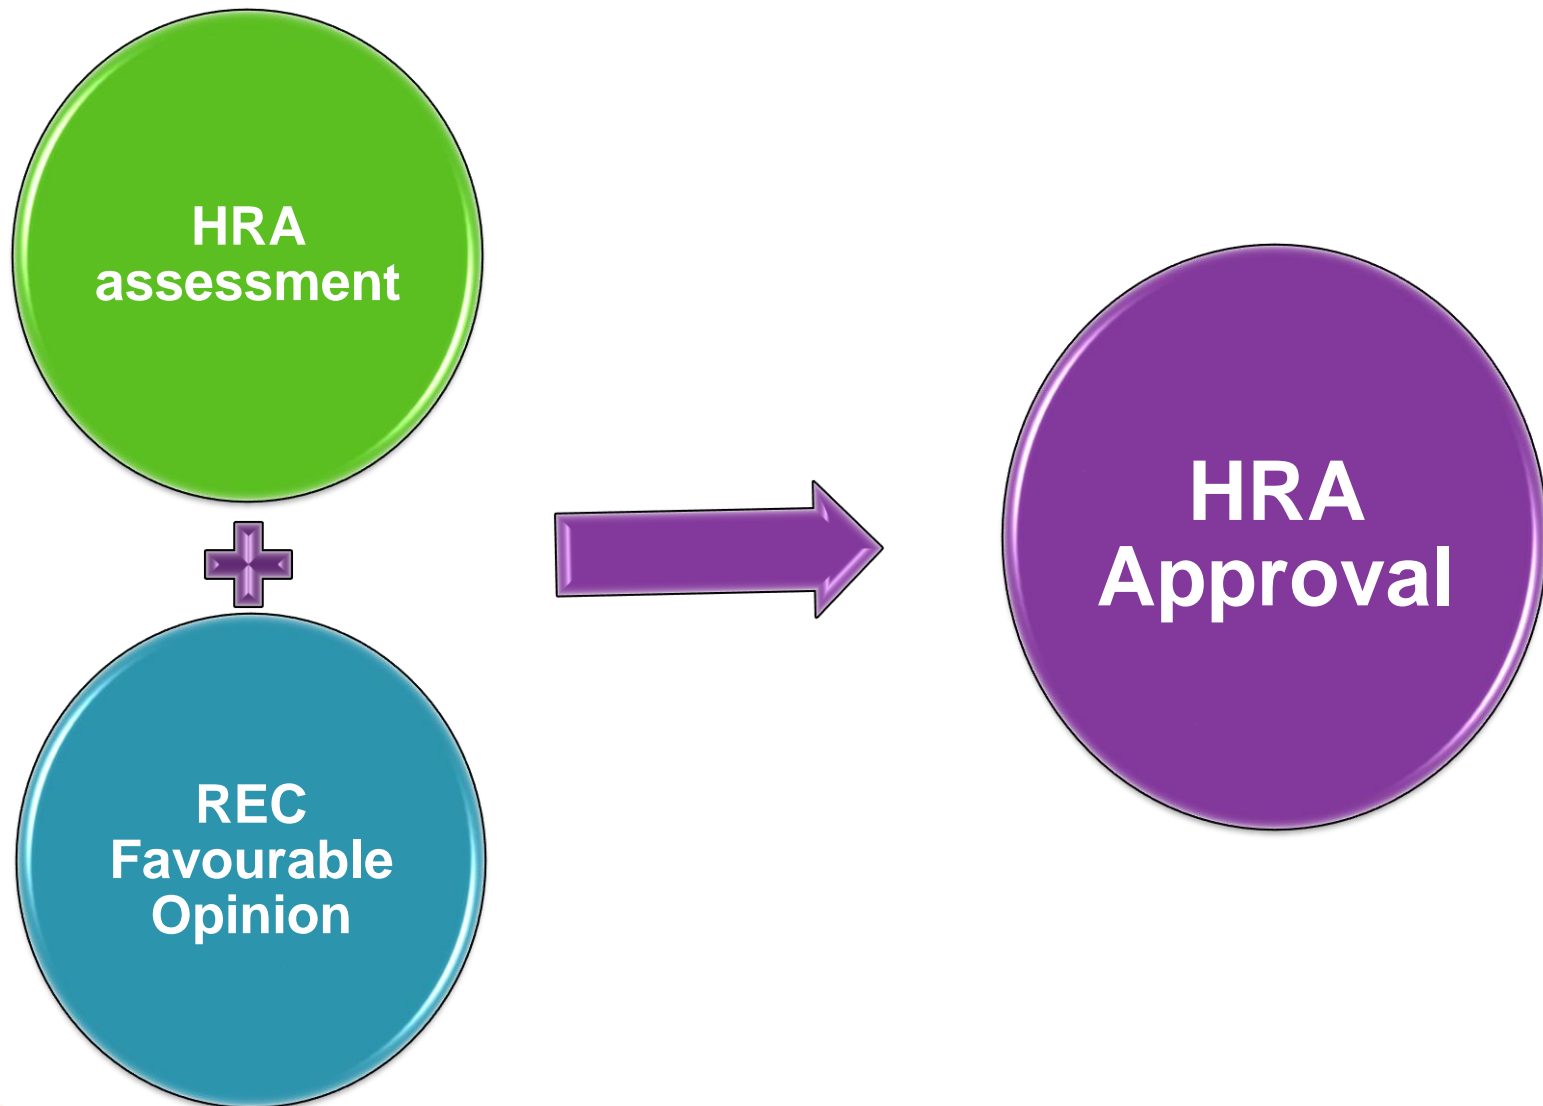

**Less time
and effort
setting up
studies**

**More research
funding spent
on research**

**More global
first
participants**

**Increased
NHS staff
productivity**

The diagram illustrates four research pathways as arrows pointing right. The top three arrows are stacked and overlap: a purple arrow labeled 'HSR', a darker purple arrow labeled 'Primary care only', and a blue arrow labeled 'Non-trials'. Below these is a light blue arrow labeled 'Trials'. At the bottom, separated by a gap, is a green arrow labeled 'Pharmacy and radiation assurances'. A thin blue horizontal line runs across the top of the slide, and an orange decorative logo is in the bottom left corner.
