Cancer and Bone - Who to Treat, When and With What?

Weston Park Hospital Lecture Theatre, Whitham Road,
Sheffield S10 2SJ

**Due to COVID-19 restrictions, this
free educational event will now
take place in spring 2021**

The workshop will cover the latest developments in bone and cancer - including biology, monitoring of treatment effects, imaging, adjuvant use of bone-targeted agents, patient selection and new therapeutic approaches.

Programme

10.30-10.40	Welcome and Introduction to the day - Prof Sarah Danson
10.40-10.55	“The biology of bone metastasis in solid tumours - from dissemination to overt lesions” Prof Ingunn Holen
10.55-11.15	“Haematological malignancies - the integral role of the bone microenvironment” Dr Andy Chantry/Dr Shelly Lawson
11.15-11.35	“What bone markers can tell us - why include them in clinical trials “ Prof Richard Eastell
11.35-11.50	Coffee break
11.50-12.10	“Bone targeted agents - which ones to use for which population(s)?” Dr Caroline Wilson
12.10-12.30	“ONJ and atypical fractures - the dark side of bone-targeted agent” Dr Matt Winter
12.30-12.50	“Bone-targeted agents in the adjuvant setting - where are we?” Prof Rob Coleman
12.50-13.45	Lunch
13.45-14.05	“Bone-targeted agents being used beyond breast, prostate and myeloma” Prof Sarah Danson
14.05-14.20	“Osteosarcomas - how do we deal with rare bone tumours” Dr Robin Young
14.20-14.40	“Radium-223, the new kid on the block” Prof Janet Brown
14.40-15.00	“Whole body MRI for Bone Metastasis Assessment” Prof Anwar Padhani
15.00-15.20	“Bone MDTs - sharing the Sheffield experience” Lead by Dr Kash Purohit
15.30	Q&A, Discussion, close of meeting
