The Network

The Experimental Cancer Medicine Centre network consists of 18 adult and 11 paediatric early phase research centres across the UK conducting Phase I/II trials. The Network is supported by a central Programme Office team based in Cancer Research UK

The Network is funded by Cancer Research UK, and the Department of Health (inc. devolved nations)

To enable early feasibility discussions for clinical trials and to facilitate academic research discussions, the network developed a network wide standard NDA template.

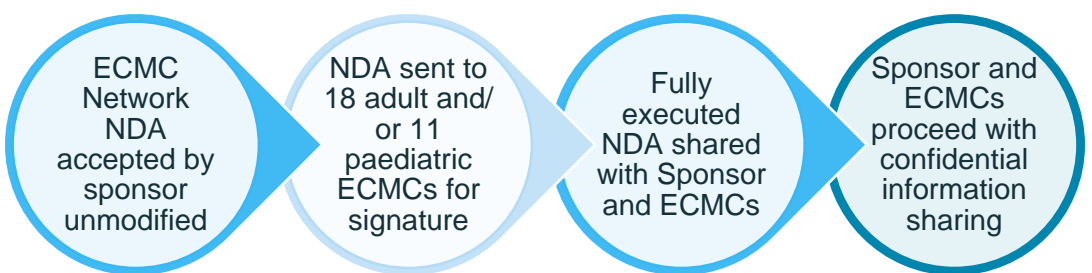

Both the Adult and Paediatric ECMC non-disclosure agreements are signed by a centre NHS trust, university and the sponsor. The NDA enables sharing of confidential trial details to solicit expressions of interest and site capability/capacity information and expressions of interest to support placement of trials. This supports placement of trials and faster study set up in the UK.

The Network NDA has been pre approved by all centres and when accepted in its unmodified form, sites complete signing in 10 days.

NDA Process

Project Specific NDA

Master Level NDA

- Covers sharing of information related to the detailed project only – usually a clinical trial.
- Should there be a requirement to share information about another trial at a future date, we would ask all signatories to sign a new NDA.
- Covers sharing of information (trial or otherwise) for a five-year timeframe.
- Any new trial or discussion in that timeframe only requires the Sponsor to sign a Project Discussion notice.
- The PD notice is then shared with all parties as a reminder that the project/topic is covered by the Master NDA.
