

Call for new members for the ECMC Junior Investigator Network Group (JING) Steering Committee

The ECMC JING Steering Committee is looking for new members to join the committee. This is a great opportunity as members will have the chance to:

- Shape the agenda for the JING: Training the Next Generation event
- Network with other scientists/clinicians (from the adult and paediatric ECMCs across the UK) who are establishing themselves as independent researchers
- Increase your understanding of the ECMC and contribute to its evolving role in drug development

Who are we looking for:

- Any early career cancer researcher committed to becoming an independent investigator, such as clinical colleagues wishing to specialise in a cancer-relevant field and from final year of PhD onwards for non-clinical colleagues
- Junior investigators up to the point of completing your first programme or project grant
- Mix of clinical (including sub-specialities such as **surgery**, **haematology**, **pathology**, **radiology** and **paediatrics**) and non-clinical nominations (from relevant translational scientific fields including **bioinformatics** and **genomics**)
- You need to be based at an adult or paediatric location. Contact hannah.brown@cancer.org.uk if you have any queries about this

Commitment

- The Steering Committee has meetings at least three times per year primarily via teleconference and members are expected to attend at least two of these meetings (or, at the very least, contribute to the agenda/minutes of 2/3 meetings) and to contribute up to 5 hours/month on network projects/reviewing network documents

Process:

- Send the ECMC Programme Office (hannah.brown@cancer.org.uk) your CV and a covering email/letter explaining why you would like to be on the steering committee and what you think you could bring to the group by **Friday 24 March**
- The ECMC Programme Office will get back to all applicants regarding their decision by **the end of April**

Jointly funded by:
